Maria Davydova, CEO of PJSC Detsky Mir:

"Detsky Mir had an outstanding first quarter in 2021: we not only managed to up the pace of business growth, we also secured a significant increase in EBITDA and net profit. Even with an uncertain market outlook, we are bullish on the future of the Company and believe our chosen strategy is solid.

"First, we find our impressive online sales figures encouraging, as even off a high base from last year following the surge in demand for online shopping, they continue to outpace the market. A strategic priority for us now is to further increase the share of our online channel in total sales to 45%. Still, by actively developing our own marketplace and expanding our product assortment, we see a good chance of exceeding this target.

"The Detsky Mir Development Strategy to 2024, which was approved last summer, envisages a doubling of GMV in four years, driven by increased investment in infrastructure and new business verticals. The Company's plans for 2021 include the launch of at least 70 new Detsky Mir stores, 100 Detmir Pickup retail outlets and 70 Zoozavr stores. At the same time, we will grow our network of partner pickup points to 20,000.

"Furthermore, Detsky Mir plans to open its first new digital-format store in Q2 to provide a superior customer experience for those willing to pick up their online order in-store. We will use the outcomes of this pilot to come up with a mid-term modernization roadmap for the whole network of our stores.

"In April, we opened our second regional distribution center, located in Kazan. Our logistics infrastructure is soon to be reinforced with three more facilities: two regional distribution centers will be opened in the Novosibirsk and Leningrad Regions by the beginning of 2022, while a federal distribution center will be opened outside Yekaterinburg in January 2022, bringing total warehouse floor space to over 200,000 sq. m. Meanwhile, building up our retail infrastructure will ensure better penetration for our express delivery service out in the Russian regions.

"The Detsky Mir team will definitely bring new improvements to the user experience and functionality of our mobile platform, as this is now the major engine of online sales at the Company. We have sound plan for new features this year, including delivering children's goods in one hour, adding a 'pay in installments' option and launching delivery of orders on-demand from our store. We aim to become one of the top Russian mobile apps in the Shopping category.

"I would also like to draw your attention to the fact that Detsky Mir's net profit (RAS) for Q4 2020 increased by 10.8% to RUB 4.5 bn. We will recommend that the Board of Directors and shareholders distribute all net profit as a final dividend for 2020, making Detsky Mir not only a growth stock, but an attractive dividend story."

Despite strong economic and pandemic-related headwinds both in Russia and globally, Detsky Mir further accelerated its business growth in Q1 2021, with the Group's gross merchandise value (GMV) increasing by 15.6% year-on-year to RUB 39.6 bn.

The key drivers of GMV growth: (1) a sharp growth in online sales, thanks to faster delivery times and a smoother user experience (2) a normalization in customer traffic at Detsky Mir stores vs. the same period in 2020 (3) a full ramp-up of stores opened in 2019 and 2020 (4) the development of an exclusive assortment of private labels and direct imports (5) price leadership across all categories.

In the reporting quarter, the Company maintained high growth rates for its online platform in Russia (+78.2%), and increased this channel's share in total sales 1.6x to 28.6%. This is still one of the highest results in the online segment. At 83.6%, the vast majority of Detsky Mir's online sales continue to be collected from retail stores and pickup points.

A total of 74% of all online orders were placed through the Company's mobile app, which has been downloaded almost 9 m times since launch 10 . The platform's monthly active users (MAU 11) increased 3.4x year-on-year to 3.0 m.

Detsky Mir's product assortment¹² on its online platforms grew to 321,000 SKUs over the quarter, with more than 800 new brands now available to our customers. The marketplace's contribution to Group GMV exceeded RUB 399 m, representing almost 4% of the Company's total online sales in Russia.

Stores in Kazakhstan and Belarus are showing one of the highest sales growth rates in the retail segment, already accounting for over 4% of total Group sales. In Kazakhstan, the Company's online channel has achieved its first major breakthrough: its share increased 2.4x year-on-year to 8.3%.

Toys and Apparel & Footwear led the charge in sales growth in Q1. In January, Detsky Mir had a bumper winter sales season, and followed this up with impressive results in the Men's day and Women's day period in late February to early March. The Company also posted impressive sales growth rates for its spring collection of Apparel & Footwear, thanks to the compounding effect of a warm March and a low base from the COVID-19 pandemic.

This resulted in the Toys category's share in total sales increasing by 1.4 p.p. year-on-year to 32.3%, while the share of Apparel & Footwear in sales saw a growth of 1.6 p.p. year-on-year to 25.5%. The latter category's sales increased 2.3x in the online channel.

In parallel to this, Detsky Mir continued to actively develop its private labels and switch to direct contracts with producers, securing the best prices on the market. Sales of private labels and direct imports in Russia grew by 18.3%, accounting for 40.4% of total sales (+1.4 p.p. year-on-year).

In Q1 2021, strong revenue growth combined with a growing share of high-margin categories in total sales and operational efficiency gains enabled the Company to boost adjusted EBITDA by 37.3% year-on-year to RUB 3.1 bn. Adjusted EBITDA margin grew 1.4 p.p. year-on-year to 8.7%.

Gross profit margin in Q1 2021 increased by 0.3 p.p. year-on-year to 29.6%, driven by the following factors: (1) an increase in the share of high-margin products and private labels in total sales (2) an increase in recognized supplier bonuses as some marketing activities were shifted from December 2020 (3) an increase in transportation expenses, due to higher fares and an increase in the share of direct deliveries in online orders (4) price investment.

Detsky Mir is committed to the continuous enhancement of operational efficiency by reducing operating costs. In Q1 2021, rental expenses as a percentage of revenue decreased by 0.6 p.p. year-on-year. The Company cut personnel costs as a percentage of revenue by 0.2 p.p. year-on-year. Replacing paper marketing materials with electronic communications enabled the Company to cut marketing expenses as a percentage of revenue by 0.2 p.p. year-on-year.

As a result, adjusted SG&A less amortization, depreciation and LTI expenses as a percentage of revenue decreased in Q1 2021 to 21.0%, down 1.0 p.p. from the same period last year.

In Q1 2021, net interest expenses as a percentage of revenue decreased by 0.4 p.p. year-on-year on the back of the decrease in net debt and cost of debt. Detsky Mir's average weighted cost of debt as at the end of the reporting period declined by 1.9 p.p. to 6.6%.

Income tax expense for Q1 2021 stood at RUB 433 m, compared to income tax benefit of RUB 251 m for the same period last year. The effective income tax rate was 24.8%. Costs related to the depreciation of fixed assets and the amortization of intangible assets as a percentage of revenue fell by 8.6% year-on-year to RUB 627 m, following a decrease in CAPEX in 2020 and an increase in the share of fully depreciated fixed assets.

During the reporting period, Detsky Mir experienced FX losses totaling RUB 56 m, compared to a loss of RUB 1,267 m in the same period last year. The key drivers included the revaluation of foreign currency liabilities (accounts payable to suppliers of goods), as well as the result of executing previously opened forwards and revaluing new ones. Cash FX losses amounted to RUB 196 m.

Adjusted net profit for the reporting quarter was RUB 1.5 bn vs. a profit of RUB 15 m for the same period last year. Adjusted net profit margin was 4.3%.

In Q1 2021, operating cash flow before changes in working capital (adjusted EBITDA) grew by 37.3% year-on-year, reaching RUB 3.1 bn. Investments in working capital dropped by 4.1% year-on-year to RUB 7.4 bn. This was driven mainly by the improvement in inventory turnover thanks to high sales growth.

Net interest expenses and income tax in the reporting period increased by 19.1% to RUB 1.0 bn. The Company's other operating cash income was RUB 371 m, vs. a loss of RUB 79 m in the same period last year. The growth in other operating cash flows is linked to changes in non-cash items (provisions for inventory write-downs and depreciation of fixed assets, LTI expenses, and other).

As a result, cash invested in operating activities decreased by 22.5% year-on-year to RUB 4.9 bn in Q1 2021.

Cash used to finance investment activity and to acquire fixed and intangible assets increased 2.9x year-on-year to RUB 945 m. Significantly higher CAPEX was driven by an advance payment to the sum of RUB 688 m for the construction of our third federal distribution center, located in the Urals. CAPEX for the retail chain's expansion totaled RUB 59 m in Q1 2021. Investment in IT development amounted to RUB 105 m.

Cash from financing activities in the reporting period amounted to RUB 5.3 bn vs. RUB 15.8 bn in the same period last year. The decrease was driven by debt reduction.

As of 31 March 2021, the Company's total debt was RUB 25.1 bn, including short-term (22.9%) and long-term (77.1%) debt. Net debt decreased by 0.9% year-on-year to RUB 24.0 bn amid higher cash liquidity at the Company. All of the Company's debt is denominated in Russian rubles. As of 31 March 2021, the Company's available undrawn credit limit with leading Russian and international banks totaled RUB 32.5 bn. Net debt/adjusted EBITDA decreased to 1.4x against 1.6x at March-end 2020.

- (8) Hereinafter, adjusted net profit is calculated as profit for the period adjusted for the share-based compensation expense and cash bonuses under the LTI program. See Attachment A.
- (9) Hereinafter, net debt is calculated as total borrowings (defined as long term loans and borrowings and short-term loans and borrowings and current portion of long-term loans and borrowings) less cash and cash equivalents. Lease liabilities are not included in the calculation of net debt. Adj. EBITDA LTM is calculated as adj. EBITDA for the last 12-months period.
- (10) Includes all merchandise featured on the Company website and mobile app.
- (11) Reflects the total number of app installations between its launch (December 2019) and the end of the reporting period.
- (12) MAU monthly active users the average number of active mobile app users in a month.
- (13) LFL revenue growth in Russian rubles, LFL number of tickets growth and LFL average ticket growth are based on stores in operation for at least 12 full calendar months preceding the reporting date. A store is considered comparable and is included in the calculation of the monthly like-for-like if the difference between the number of days worked in comparable months does not exceed three working days.
- (14) In order to improve margins by accelerating the opening of our small-format Detmir Pickup stores, the Group decided to close its ELC and ABC stores in Q3 2020, which accounted for less than 0.8% of total Group revenue in 2019.
- (15) The Company has applied IFRS 16 "Leases" for its unaudited financial results beginning on January 1, 2018. However, this table provides a comparison of key financial indicators on an IAS 17 basis, as in management's opinion, this approach allows the Company to more accurately assess the trends and dynamics of its business growth. This table also provides our financial results on an IFRS 16 basis.

Attachment A

EBITDA is calculated as profit for the period before income tax expense, foreign exchange (loss)/gain, gain on acquisition of controlling interest in associate, finance expense, finance income, depreciation and amortization. EBITDA margin is calculated as EBITDA for a given period divided by revenue for the same period expressed as a percentage. Our EBITDA may not be similar to EBITDA measures of other companies; is not a measurement under accounting principles generally accepted under IFRS and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of profit and loss. We believe that EBITDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions of businesses and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under IFRS, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. EBITDA is commonly used as one of the bases for investors and analysts to evaluate and compare the periodic and future operating performance and value of companies.

Adjusted EBITDA and Adjusted profit for the period are used to evaluate the financial performance of the Group. This represents an underlying financial measure adjusted for one-off gains and losses. We believe that adjusted measures provide investors with additional useful information to measure our underlying financial performance, particularly from period to period, because these measures are exclusive of certain one-off gains and losses.

EBITDA and Adjusted EBITDA of the first quarter can be reconciled to our consolidated statements of profit and loss as follows:
